

Identity Management Services

CyberScout®

offers valuable services that deliver continuous protection at every stage of life.

Did you know identity theft claims more than 14 million victims a year? That's a new victim every three seconds.¹ And with identity theft taking months to resolve, it is as important as ever to get the protection you and your family deserve. You can count on CyberScout for services that help you minimize threats, monitor personal information and manage recovery if you're ever the victim of identity theft or fraud.

IDENTITY MANAGEMENT

Dark Web — Continuous monitoring of the internet – places such as black market websites, underground chat rooms and forums – to detect suspicious activities before your personally identifiable information (PII) is stolen. You'll receive alerts when your SSN, credit card numbers, financial account numbers, medical ID, email, phone number and more are detected.

Social Security Number Monitoring — Reviews names, aliases and addresses associated with your number for signs of fraud.

Credit and Debit Card Monitoring — Be notified when changes, such as your name, address, or a new account holder, are made to your credit or bank accounts.

Financial Account Monitoring — Receive alerts when new accounts are opened, or changes are made to an existing credit or bank account.

Sex Offender Notification — Monitors registered sex offenders living near you to ensure an offender hasn't registered using your name and address.

Social Media Monitoring — Proactively protecting your family's reputation and online activity by monitoring popular social media services for information that could be dangerous or damaging.

Password Protector — An easy way to track your account credentials and reduce hacking risks.

Comprehensive Identity Monitoring — Additional sources are also monitored, including court records, payday loans, change-of-address and more.

CREDIT MONITORING

Daily Credit Bureau Monitoring — Daily monitoring of your personal records from three credit bureaus.

Credit Report and Score — Provided annually by three credit bureaus.

Score Tracker — Ongoing tracking of your credit score. Downward trends may tell you that new accounts are being opened in your name.

Child Monitoring — Monitors your child's PII to detect changes associated with your child's identity.

RESOLUTION

Resolving identity theft or fraud can be time-consuming and can sometimes involve expenses, including lawyer fees, loss of wages and more. So, at CyberScout, we're pleased to offer **expense reimbursement insurance** to pay covered costs associated with the resolution process.

Plus, as a CyberScout subscriber, you'll have access to our **robust mobile app** with one-touch, 24/7 assistance from our **world-class Resolution Center Support Team**. Our trusted, experienced, fraud resolution team will work with you until your issues are completely resolved.
